This power can be used to operate the ballast and/or canting keel system.

For multihulls only, this power can be used to operate an anticapsizing system that fully or partially releases the sheets. This system must in no case enable the sail to be sheeted in. For Ultim class boats: to operate the mobile hull appendage trimming actuator. The energy used by the actuator to complete the movement must be produced by the crew, in compliance with RRS 52 and an emergency system must enable blocking of mobile hull appendages must be demonstrated.
